

GEODESIC DOME

FOR ENGINEERING DRAFTING CLASS

Greetings!

For all those engineering/builders and pet lovers out there, here is a challenge for you! Your task, if you choose to accept, is to construct a Geodesic Dome out of cardboard. There are a few structures and “house” actually located in the greater Benton City area that feature this type of construction.

Your Challenge:

- Read and follow the “Instructables” Cardboard Geodesic Dome instructions
- Construct a dome for yourself, your choice of size
- Send a picture of your completed dome (pet is optional) with you beside it (or inside it) to me in an email
- Remember: be creative and consistent. Put your own spin on it and/or customize it.

Email: dlake@kibesd.org

GOOD LUCK AND HAVE LOADS OF FUN!

Cheers!,

Lake
